

BROKEN DOWN? DO THIS.

1

PULL OFF SAFELY

Hazards on. Triangles out. Stay visible, stay off the road.

2

OPEN OVERHAULOS & TAP "BREAKDOWN"

The big red button on the home screen.

3

PICK THE UNIT & THE PROBLEM

Truck, trailer or dolly – then the fault type. Add photos if safe.

4

CONFIRM & WAIT IN A SAFE PLACE

GPS sends your exact spot. No signal? It sends automatically later.

5

TRACK YOUR MECHANIC

Watch the ETA count down. Give the mechanic your 6-digit code on arrival.

FEEL UNSAFE? LONG-PRESS THE SOS BUTTON.

Silent alarm – no sound, no light. Your controller and emergency contacts get your live location.

The SOS button is always on your screen. Use it for any danger – not only breakdowns.

REMEMBER

- ▶ NEVER pay the mechanic. There is no cash – your company is billed by OverhaulOS.
- ▶ Answer the welfare check while you wait (every 15 minutes) – silence alerts your controller.
- ▶ Crossing a border? Nothing changes – the same button works in every country.
