

YOUR TRUCK BROKE DOWN. HELP IS ON THE WAY.

OverhaulOS connects broken-down truck drivers with nearby verified mechanics in minutes — across 7 African countries, across borders, day or night. Like Uber, but for truck recovery.

HOW IT WORKS

- 1 Driver reports** One tap in the app. GPS pins the exact unit and location — even offline.
- 2 Controller confirms** Your fleet controller approves instantly from the live dashboard.
- 3 Mechanic dispatched** The nearest verified specialist accepts; everyone tracks the ETA live.
- 4 Invoice draws down** Job closes with a photo; the invoice draws your prepaid balance down.

WHY COMPANIES CHOOSE OVERHAULOS

- ▶ Prepaid credit, loaded by EFT — no cash at the roadside, no month-end bills, no debt.
- ▶ Verified mechanic network with guaranteed payment on both sides.
- ▶ Cross-border by design: the platform follows the truck into 7 countries.
- ▶ Driver safety built in: silent SOS, welfare checks, live tracking.
